

# COMMERCIAL DECKING

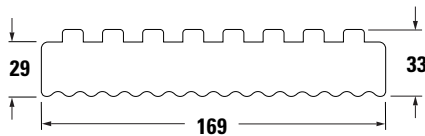

## TECHNICAL SPECIFICATIONS

**ADROIT.**

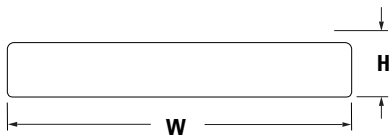

YOUR PROJECT. YOUR WAY. BE ADROIT.

EcoSpan (D010)

Commercial (D005)

Profile (All other)

### PRIMARY APPLICATION

Composite decking profiles are an alternative to both softwood and hardwood material but are more hardwearing and have a higher resistance to abrasion.

Available in a charcoal that closely resembles weathered timber, or colours in selected profiles, Adroit decking is easy and safe to install and will not gradually lose its material properties as it ages in comparison to alternatives.

Unlike the alternatives composite decking will not rot, rust, splinter or require maintenance. Some decking profiles are even available made from robust EcoTuff™.

Utilise for boardwalks, jetties, decking, poolside, landings, ramps and stairs. We recommend an EcoTuff™ sub frame to maximize structure longevity.

### D CHART

Profile Type (PT)	Width (mm)	Height (mm)	Max Section Length	Weight Kg/m
D005 	169	33	6000	5
D010 	190	55	6000	6
AD-Z	70	25	6000	1.6
AD-A	100	25	6000	2
RE060 	140	40	6000	5.7
AD-X	150	35	6000	4.5
AD-B	200	40	6000	7
AD-C	200	50	6000	8

### FEATURES

- EcoTuff™ profiles have an integrated tread pattern.
- No toxic treatments to leach into the environment or end users.
- Co-mingled material means timber performance with no warping or significant expansion & contraction.
- Won't rot so can be used totally submerged where required.
- Lighter weight than steel or concrete means easier installation with less people and equipment.
- Splinter free nature and lack of sharp edges reduces exposure to liability.
- 100% recycled post consumer waste feedstock means your decision is great for the environment.
- Extruded material so can be produced in most shapes, dimensions or lengths.

### OPTIONS

- Available in a large range of standard sizes and lengths, with tread patterns available on any profile on request.
- For an easier install consider our large span decking profile.

### MODELS

**Profile Type (PT)** - PT XXX – To specify the size you want refer to the D Chart to choose a Profile Type and then build your specification code as shown.

ADROIT-**D2005**-2800-SC (example)

**Section Length (SL)** – Specify your section length in mm up to the maximum section length.

ADROIT – D005-**2400**-SC (example)

### Colour (CC)

SC - Charcoal Grey

HG- Heritage Green

IB - Blue

TC- Terracotta

EcoTuff™ is only available in SC.
