

At Gossen, we recognize the importance of sustainable products for the residential construction and remodeling industry. National organizations, such as Leed and NAHB, acknowledge the efforts of Green Builders, rewarding them for using eco-friendly products. Resource and energy efficiency are critical requirements of the Green Building Standard.

Reasons for using Gossen cellular PVC products:

NAHB 601.7 No site applied finishing is required. This eliminates the use of VOC.

NAHB 602.8 Termite Resistant

NAHB 604.1 Product is recyclable and contains pre-consumer recycled content.

NAHB 609.1 Sustainability. Meets or exceeds its application based on the use of a Life Cycle Assessment (LCA) tool compliant with ISO 14044 or other recognized standards that compare the impact of building materials.

Product is more energy efficient than similar products and is carbon neutral.
